

Application No. 10/803,179  
Response to Restriction Requirement and  
Preliminary Amendment

REMARKS

Consideration of the present application in view of the above amendments and the following remarks is respectively requested. Claims 1-24 and 26-36 were pending.

In response to the Restriction Requirement, Applicants hereby elect Invention I, drawn to pyrazino[2,1-c][1,2,4]triazines (*see, Table 2*). Applicants have canceled claims 3 and 4 without prejudice to the filing of any divisional, continuation, or continuation-in-part application. Accordingly, claims 1, 2, 5-24, and 26-36 are pending. Claims 1, 2, 5, and 9-11 have been amended to delete the non-elected subject matter and to make minor editorial changes. Such deletions have also been made without prejudice to the filing of the deleted subject matter in a related divisional, continuation, or continuation-in-part application in future prosecution. Support for the phrase “with the proviso that when Z is CH, then X is nitrogen” may be found, for example, in original claim 5. No new matter has been added.

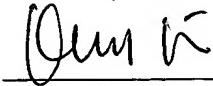

Applicants respectfully traverse the restriction between Inventions I and IV. Applicants submit that examination of Inventions I and IV in the present application would not create a serious burden for the Patent Office. More specifically, Invention IV is drawn to a library of compounds that comprises at least one compound according to claim 1. Thus, prior art references relevant to Invention I would also be relevant to Invention IV. Accordingly, no separate prior art searches are needed if both Invention I and Invention IV are examined in the present application. Therefore, Applicants respectfully request that Inventions I and IV be rejoined in the present application.

Application No. 10/803,179  
Response to Restriction Requirement and  
Preliminary Amendment

The Director is authorized to charge any additional fees due by way of this Amendment, or credit any overpayment, to our Deposit Account No. 19-1090.

Respectfully submitted,
